

Algorithm of work for ONYCHOLYSIS problem.

author: Shtapper L.V.

No	Name of the cosmetic	Volume, ml	Exposure/ treatment time, min	Application	Effect
1	Gel liquid gloves	2 ml	-	Shake before use. Apply the gel to hands and rub until fully absorbed.	Antiseptic treatment of the manicurist before the procedure begins.
2	Multi-purpose sanitizer	2 ml	-	Apply the cosmetic to the treated surface of hands/feet.	Antiseptic treatment of the client before the procedure begins.
3	Onycholysis clearing	-	-	Remove the peeled off or affected area of the nail in a convenient way (with cutting or rotating tool). Be sure to smooth the edges.	After clearing onycholysis, perform any kind of manicure. Or proceed to preventive care.
4 Choose one. Depends on the manicurist's technique.	Wet manicure. Gel bath with a softening effect	0.3 ml	10-15	Add a few drops of the cosmetic to the manicure bath. Submerge hands in it and leave for 3-5 minutes. Remove cuticle.	Maceration.
	Cuticle removal (for dry manicure) Cuticle remover gel or Cuticle remover liquid	0.8 ml	1-5	Apply the product to the cuticle and around the nail plate. Then move it away with a pusher and remove it using cutting tools or burrs.	Safe softening/loosening of the cuticle for easy removal. The elasticity of the cuticle is preserved, which protects it from hangnail formation.

5	Preventive lotion for nails №1 Stop onycholysis	0.4 ml	-	Apply 1-3 drops on the cleared nail plate or in small voids (if the customer refused to clear onycholysis).	Nail plate treatment.
6	Preventive lotion for nails №2 Stop onycholysis	0.4 ml	-	After lotion №1, apply 3-5 drops of the lotion №2.	Nail plate treatment.
7	Regenerating serum for nails Stop onycholysis	0.4 ml	-	Shake before use. Apply the serum to the surface of the nail and massage until absorbed.	Moisturization and regeneration of the nail.
8	Nail oil Stop onycholysis	0.3 ml	-	Shake before use. Apply oil to the nail, cuticle, and skin of the nail wall, massage, and leave until absorbed.	Nutrition, protection and sealing of the nail plate.
9	Regenerating balm for nails Stop onycholysis	0.3 ml	-	Apply a small amount of balm to the nails and rub with soft massaging movements or nail buffer.	Nutrition, protection and sealing of the nail plate.
10	<p>Home care:</p> <ul style="list-style-type: none"> - preventive lotion for nails №2 Stop onycholysis - use daily 2-3 times a day; - regenerating serum for nails Stop onycholysis - rub into the nail plate daily 2 times a day; - regenerating balm for nails Stop onycholysis OR nail oil Stop onycholysis - use daily 2 times a day. <p><i>Approximate calculations were made for one manicure/pedicure procedure. The calculation was made relative to the price of the master. *The volume specified in parentheses was used during the calculation.</i></p>
