

## Algorithm of pedicure procedure — DEEP CORN TREATMENT

№	Name of the cosmetic	Volume, ml	Exposure/ treatment time, min	Application	Effect
1	Gel liquid gloves	2 ml	-	Apply the required amount of gel to the skin and rub until absorbed.	Antiseptic treatment of the manicurist before the procedure begins
2	Multi-purpose sanitizer	2 ml	-	Apply the cosmetic to the treated surface/tools	Antiseptic treatment of the client before the procedure begins.
3	Carbamide peeling with moisturizing effect	3 ml	1-20	Apply carbamide peeling (pH = 7) to the skin of the feet. Treat the loosened areas of the skin with a cutter.	Safe softening/loosening of coarse skin areas for easy removal.
4	Callus eliminator with soda	3 ml	10-15	Apply the softener to the area of the callus, keep the exposure for a specified time, remove the softened corn with a ball cutter.	Softening of coarse areas of skin, corns.
5	Therapy peeling for foot care	2.5 ml	5-20 The exposure time includes active peeling and gel absorption.	Apply the therapy peeling on the treated surface and carry out active peeling with massage movements. Then the gel absorbs, shake off the micro granules of the therapy peeling.	Smoothing, massage, regeneration.
6	Regenerating serum for foot care	3 ml	2-3	Apply the required amount of gel to the feet skin and rub until absorbed.	Nutrition, regeneration of feet skin.

7	Regenerating gel for foot care	2 ml	2-3	Apply the gel to the surface of the foot skin and massage until absorbed.	Moisturizes and initiates foot skin regeneration programs.
8	Propolis extract with ekdys	0.2 ml	1-3	Apply the extract to the area of the deep corn and leave until completely dry.	Anti-inflammatory, anesthetic.
9	Regenerating biowax	0.5 ml	1-3	Apply the regenerating biowax to the area of the deep corn and let it soak in.	Additional protection and initiation of foot skin regeneration programs.
10	Propolis gel with ekdys	0.2 ml	1-3	Drop the gel into the area of the deep corn and leave until completely dry.	Anti-inflammatory agent. Creates a patch effect. Breathing cellulose film protects the problem area for a long time.
11	<p>Home care:</p> <ul style="list-style-type: none"> <li>- regenerating gel for foot care, or regenerating serum for foot care (daily);</li> <li>- propolis gel with ekdys: apply 2-3 times a week to the affected area for infection prevention;</li> <li>- regenerating biowax (as required, to eliminate skin dryness).</li> </ul> <p><i>Approximate calculations were made for one manicure/pedicure procedure. The calculation was made relative to the price of the master. *The volume specified in parentheses was used during the calculation.</i></p>
