

Algorithm of pedicure procedure for diabetic foot (hardware method)

№	Name of the cosmetic	Volume, ml	Exposure/ treatment time, min	Application	Effect
1	Multi-purpose sanitizer	2 ml	-	Apply the cosmetic to the treated surface/tools	Antiseptic treatment of the client before the procedure begins.
2	Carbamide peeling with moisturizing effect	3 ml	1-5	Apply carbamide peeling (pH = 7) to the skin of the feet. Treat the loosened areas of the skin with a cutter.	Safe softening/loosening of coarse skin areas for easy removal. The moisture and elasticity of the skin is preserved.
3	Remover. Cuticle remover liquid	0.8 ml	1-5	Apply the remover around the nail plate. Exposure time - 5-10 minutes. The areas around the nail plate and nail plates themselves are treated in any convenient way for the manicurist after softening. Cut the ingrown edge of the nail.	Safe softening around the nail plate.
4	Therapy peeling for foot care	2.5 ml	5-20 The exposure time includes active peeling and gel absorption.	Apply the therapy peeling on the treated surface and carry out active peeling with massage movements. Then the gel absorbs, shake off the micro granules of the therapy peeling.	Smoothing, massage and initiation of foot skin regeneration programs.
5	Regenerating gel for foot care	2 ml	1-3	Apply the gel to the surface of the foot skin and massage until absorbed.	Moisturizes and initiates foot skin regeneration programs.

6	"Perfect heels" regenerating biowax cream	0.5 ml	-	Apply a small amount of the agent (concentrate) to the skin and rub it with soft massage movements until absorbed.	Moisturizes, heals cracks and initiates foot skin regeneration programs.
7	Placental powder	0.5 g	-	Apply the necessary amount of the cosmetic to the problem area.	It has regenerating and anti-inflammatory properties. Accelerates the healing process of wet calluses, wounds, cracks, injuries.
8	<p>Home care: -therapy peeling for foot care (daily); -regenerating biowax (as required, to eliminate skin dryness); -placental powder (as required, to improve regeneration of problem areas).</p> <p><i>Approximate calculations were made for one manicure/pedicure procedure. The calculation was made relative to the price of the master. *The volume specified in parentheses was used during the calculation.</i></p>
