

*Pedicure Service Procedure for YOUNG / WELL-GROOMED FEET**

№	Name of the cosmetic	Volume, ml	Exposure/ treatment time, min	Application	Effect
1	SANITAR Protecting Lotion	2 ml	-	Apply the SANITAR Protecting Lotion to the feet.	Antiseptic treatment for the client prior to the pedicure service.
2	Moisturizing Carbamide Keratolytic Agent	3 ml	3-5	Apply the Moisturizing Carbamide Keratolytic Agent to the problem areas of feet. Grind the softened skin with a milling cutter or file it off with a file. If necessary, repeat. Wash the feet with warm water and pad them dry.	Safely softens coarse skin for easy removal.
3	Therapy Gel Scrub for Foot Care	2.5 ml	5-20 Treatment time includes active exfoliation and gel absorption.	Apply the Therapy Gel Scrub for Foot Care to the treated surface and massage it to exfoliate the skin. After the gel is absorbed, brush off the scrub particles.	Polishes, massages and starts skin regeneration processes.
4	Regenerating Gel for Foot Care	2 ml	1-3	Apply the Regenerating Gel for Foot Care to clean feet and massage until fully absorbed.	Moisturizes and regenerate the skin of the feet.
5	<p>Homecare: - Apply the Regenerating Gel for Foot Care once daily.</p> <p>* - young/well-groomed feet have sufficient moisture in the skin; therefore, additional soaking in spa baths is not required.</p> <p><i>The product quantities were approximately calculated for one manicure/pedicure service. The calculation was based on the price set by the technician. * The calculation used the quantity indicated in brackets.</i></p>
